Re: General Permit for Construction of a Domestic Wastewater Collection/Transmission System
Project: ALPE Warehouse
FDEP Permit No.: CS60-0139899-072
County: Sumter

Dear Mr. Perez:

The Department has received your Notice of Intent to Use the General Permit to construct a domestic wastewater collection/transmission system to serve two commercial buildings. This project consists of a new gravity system with 8-inch diameter pipes and 2 manholes, a lift station and a 1.5-inch diameter force main. Approximately 1,200 gpd will be treated at the City of Wildwood Wastewater Treatment Facility. The Department received this Notice on July 28, 2009.

The Department has no objection to your use of a General Permit for the construction of a collection/transmission system that has been designed in accordance with the standards and criteria set forth in Rule 62-604.400, Florida Administrative Code (FAC). In accordance with Rules 62-4.530(1) and 62-604.600(6)(a)1., FAC, construction of this project shall not begin until at least 30 days after the receipt date (referenced above) of Application Form 62-604.300(8)(a). All General Permits are subject to the general conditions of Rule 62-4.540, FAC, (attached), and Rules 62-604.600 and 62-604.700, FAC. The construction activity must conform to the description contained in your Notice of Intent to Use the General Permit. Any deviation will subject the permittee to enforcement action and possible penalties.

If you have any questions, you may contact Rafah Alkhatib at (813) 632-7600, extension 333 or via email at rafah.alkhatib@dep.state.fl.us.

Sincerely,

Isabel King, P.E.
Permitting Supervisor
